PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

The Glazov Regional Military Storage Installation is located 50 kilometers (km) south-east of Glazov (58-08N 052-40E) on the south side of the Glazov-Perm rail line (Figure 1). The installation is served by a spur of the Glazov-Perm rail line but has no road service other than local secondary roads.

The installation (Figures 2 and 3) covers approximately 615 acres and consists of two functional areas: (a) the support area containing five administration buildings, 17 barracks, 26 support buildings, 55 storage buildings, and four buried POL tanks, and (b) a vehicle storage/maintenance area in two sections containing four

vehicle sheds and two maintenance buildings. A double-secured explosives storage area contains 39 explosives storage buildings, 29 general storage buildings, and 10 support buildings. Nineteen other buildings are located in the perimeter areas of the installation, and an athletic field is located in the administrative and troop housing area.

The area was covered by [redacted] missions [redacted]. Comparative analysis revealed no significant changes. Heavy summer track activity was observed with a marked decrease during winter months.

DESCRIPTION OF INSTALLATION

Railroad Service

The installation is served by a single-track rail spur with turning wye.

Road Service

The installation is served by local secondary roads.

Administrative and Troop Housing Area

Area D contains 17 barracks, five administration buildings, and 15 support buildings.

General Storage Areas

Area E1 contains 29 storage buildings and seven support buildings. The storage buildings are in three areas, divided in groups of 14, eight, and seven. The support buildings appear to be checkout and/or transfer buildings. More storage buildings were being added in [redacted] [redacted] on the east side of the installation.

Area E2 contains 25 storage buildings and nine support buildings. This area also appears to contain some open storage.

Area E3 contains 19 storage buildings, and Area E4 contains 11 storage buildings.

Ammunition Storage Areas

Area F1 contains thirty 225- by 55-foot explosives storage buildings separated by approximately 200 feet of trees or earth mounds which run the length of the buildings. The buildings appear to be served by a narrow gauge rail line which connects to the wye of the rail spur serving the installation. A transloading point is located at the apex of the wye.

Area F2 contains nine explosives storage buildings and three support buildings.

POL Storage Area

Area G contains four vertical tanks and one support building. The tanks are earth covered, which precludes mensuration.

Other Buildings

A power trace extends to three probable power substations in Area H. Sixteen unidentified buildings are scattered throughout the installation.

Equipment Storage/Maintenance Areas

Area J1 contains one 200- by 40-foot vehicle shed and one 130- by 40-foot maintenance building.

Area J2 contains three vehicle sheds, one 150 by 40 feet, one 130 by 25 feet, and one 160 by 25 feet, two 70- by 30-foot maintenance buildings, and one support building. Track activity indicates occupancy of both areas.

Athletic Field

A probable drill/athletic field (K) is located in the support area.
